

MicrobeCare™ Care and Maintenance

MicrobeCare™ is an antimicrobial coating that can be applied to a wide variety of Herman Miller Group products to protect from mold, mildew, algae and bacteria that cause deterioration, discoloration, odors and stains. MicrobeCare™ is registered with the US Environmental Protection Agency (EPA).

MicrobeCare™ is a Quaternary Ammonium Solution that covalently bonds to the surface it is applied to.

Once applied, the coating does not come off with commonly used cleaners and disinfectants.

There may be some slight residual overspray on newly treated materials. This can be wiped off with a damp clean cloth before initial use.

Normal cleaning and disinfecting information provided in Herman Miller Care and Maintenance documents can be used in conjunction with MicrobeCare™ treated materials.

As with all cleaning products, please refer to the cleaning product manufacturer's label for proper application, cleaning guidelines, specific product details, and use.
